Recreational Skippers Ticket

On 12th February 2006, The Minister for Planning & Infrastructure announced the introduction of compulsory recreational boating tickets into Western Australia. This is to be known as the Recreational Skippers Ticket.

Under the legislation, all persons in control of a vessel with greater than 6hp motor, will be required to hold a Recreational Skippers Ticket.

- Any person between 14 and 16 will be able to obtain a Recreational Skippers Ticket, but will be restricted to operating in daylight hours and an 8 knot speed limit.
- Any other person who requires a Recreational Skippers Ticket will be required to undertake the written test as above, and also be assessed on the water in a practical test that will encompass emergency situations, vessel handling, nautical knowledge, use of safety equipment and overall watercraft skills.

Marine & Industrial Training Services in conjunction with Australian Skills Training Pty Ltd, have been appointed as assessing agents on behalf of the Department for Planning & Infrastructure, for the Recreational Skippers Ticket.

To this end, we offer the following services:-

- Written assessment, followed by a practical assessment in your insured boat .
- One day full training and assessing course. This course can also be taken over 2 evening sessions with the practical component of this course being held on a weekend or week day. This can be completed in your own vessel, or you can use our surveyed training vessel.
- Courses will be conducted at Australian Skills Training premises at 85 Mell Road in Spearwood, in premises in Osborne Park, and also in premises in Wanneroo. Courses will be run each week and we will also offer a weekend course that will encompass the training and assessing.

If you can arrange sufficient numbers, we can run the courses in your home or premises. Please ring us for further details.

We can offer courses to country areas where there is sufficient demand. Travel and accommodation costs will be incurred, so the greater the number of people, the cheaper the individual cost. Please also ring us on (08) 94051985 and ask for further details.

Marine & Industrial Training & Services are still conducting the popular TL3 course, which incorporates the R S T. The TL3 course offers expanded navigation, vessel handling, nautical knowledge and boating skills.

All our instructors have a wealth of knowledge, have worked in commercial marine areas, and have current commercial qualifications. Our courses are conducted strictly in accordance with the Department of Planning and Infrastructure guidelines and are costed accordingly.
